Computation of Grade Point Average (GPA)

The student's GPA is computed by including grades earned in both the regular semesters and summer sessions. If the student repeats a course, the grade earned in the course before it was repeated is included.

If the student's GPA cannot be computed with certainty when these rules are applied, by reason of an instructor's failure to assign a grade on time, the GPA is computed tentatively by assuming that the outstanding grade is a "C." When the outstanding grade is supplied, these rules apply retroactively, and action taken on the stated assumption yields to that application. The tentative determination of GPA under this paragraph is not made in determining the student's eligibility to graduate.
